Website Purpose

fontlr is a curated type library for founders, designers, and developers who want to discover, test, compare, and self-host open fonts.

The website provides font specimens, live previews, glyph testing, license information, source references, install guidance, pairing suggestions, and documentation to help users choose and ship typefaces with more confidence.

fontlr is intended for informational, creative, educational, and design-related purposes.

Font Licenses and Third-Party Content

The fonts listed on fontlr are created by their respective authors, designers, foundries, or contributors.

Each font remains subject to its own license terms. Where available, license information, source links, and attribution details are provided on the respective font detail pages.

Although fontlr aims to provide accurate and transparent license information, users are responsible for reviewing and complying with the applicable license before using, modifying, redistributing, or shipping any font in personal, commercial, or open-source projects.

Third-party content is identified where applicable.

Submissions and Community Contributions

fontlr may accept font submissions, corrections, metadata updates, or improvements through GitHub pull requests.

Contributors are responsible for ensuring that submitted files, metadata, source links, and license information are accurate and that the submitted fonts may legally be redistributed or referenced within the project.

As a service provider, I am responsible for my own content on these pages in accordance with applicable laws.

However, I am not obligated to monitor transmitted or stored third-party information or investigate circumstances indicating unlawful activity.

Liability for Links

This website may contain links to external third-party websites, including font sources, repositories, foundries, documentation, and project pages.

I have no influence over the content of external websites and therefore cannot accept liability for external content.

The respective provider or operator of linked websites is always responsible for their own content.
